

Muhammad Rizki Pratama

Full Stack Engineer & Software Engineer

Bandung, West Java, Indonesia | m.rizkip.developer@gmail.com | +62 821-2868-8889
linkedin.com/in/muhammad-rizki-pratama | github.com/Rizkii-dev

Summary

Computer Science student at BINUS University with hands-on experience across full-stack web development (React, Laravel), Android application development (Kotlin), and coursework spanning computational biology and cloud security (Google Cloud). Delivered a commissioned, award-winning Android accessibility application and a production API during a professional internship. Strong problem-solving foundation demonstrated through multiple national science olympiad medals and active competitive programming practice.

Education

BINUS University — B.S. in Computer Science

Bandung, West Java, Indonesia

Expected 2028

- Relevant Coursework: Data Structures & Algorithms, Web-Based Programming (Laravel), Computational Biology, Software Engineering, Cloud Security (Google Cloud Skills Path)

SMA IT Insan Sejahtera — Science (IPA) Concentration

Sumedang, West Java, Indonesia

2021 – 2024

- GPA: 94/100

Experience

Back-End Engineer Intern

PT Eduka Teknologi Indonesia, Bandung, West Java

Jan 2024 – Apr 2024

- Developed a custom REST API for the company's internal Eduka System.
- Presented the API design and implementation to the engineering team.

Kader (Cadre)

MT Al-Khawarizmi (BINUS Student Organization), Bandung

2024 – Present

- Support the organization as a cadre, helping plan and organize events for a student community focused on Islamic values and technology.

Projects

Flow — Android Accessibility App (Kotlin)

Commissioned Project

May 2023 – Jun 2023

- Built a native Android application with structured phonological-awareness exercises to help children with dyslexia (word blindness) improve reading and literacy skills.
- Delivered the project on commission for a university team; tested with a real child and awarded 1st place in a collegiate competition.

Pathsnap — Travel Planning Web App (React, TypeScript)

Personal Project

In Progress

- Developing an interactive travel-planning application featuring destination discovery with filtering, detailed destination guides, and a multi-stop trip planner with live map-based route visualization.
- Built with React, TypeScript, Vite, and Tailwind CSS.

CekDini — AI Self-Diagnosis Health App (Figma Prototype)

Healtech UI/UX Design Challenge 2025 (HIMATIF / ITS RS dr. Soepraoen Malang)

Oct 2025

- Designed an AI-guided self-diagnosis concept that generates a printable diagnostic report for users to bring to a doctor, giving healthcare providers a diagnostic head start.

Technical Skills

Languages: Java, Kotlin, Python, JavaScript, TypeScript, C++, C, HTML/CSS

Frameworks & Libraries: React, Laravel, Tailwind CSS

Cloud & Tools: Google Cloud Platform, Git/GitHub, Android Studio, Docker, Visual Studio Code

Certifications & Achievements

- Google Cloud Computing Foundations Certificate
- Oracle Dev Gym — Class Perfection Award, Perfect Score (Jan 2026)
- The Genius Math League 2026 — Qualified to Regional Offline Round (from 2,500+ nationwide participants), representing BINUS University
- OSN-K (National Science Olympiad), Informatics — 1st Place, 2022 & 2023
- FKIP UISU Science Competition (FUSC) — National Gold Medal, Technology & Information, 2022
- Indonesian Science Competition (ISC) — National Gold Medal, Technology & Information, 2022
- Olimpiade Sains Seluruh Indonesia (OSSSI) — National Gold Medal, Technology & Information, 2022
- Saintech Science Competition — National Gold Medal, Computer Science, 2022
- National Olympiad of Outstanding Student (NOOS) — Silver Medal, Informatics, 2023
- Thailand International Mathematical Olympiad (TIMO) — Bronze Medal, Mathematics, 2021
- International Kangaroo Mathematics Contest (IKMC) — Bronze Medal, Mathematics, 2023
